Homelife is a local service that provides help and assistance for people of any age with day to day tasks to help them lead a better, more fulfilled life. We provide a tailored service to meet individual needs with visits by a dedicated support worker from once a month to several times a week.

In the Home: we provide assistance with cooking practice, cleaning and laundry.

Correspondence and Appointments: we can assist with understanding letters, paying bills and making appointments.

Accompanied visits: we can make accompanied visits for shopping, health appointments, trips out and walking.

Rebuilding Confidence: we can assist when leaving hospital, getting used to living with an illness or disability, getting out and about and making new friends.

HomeMove: following a personal visit which uses a list of options, a flexible service can be provided to cover all aspects of moving from compiling an inventory, liaising with furniture removals, solicitors, utility companies and family members to cleaning a property once it has been emptied - even assisting with pet re-homing.
